3 Review BRS for Measure validated measured data

Kees had distributed just before the meeting a table comparing Measured Data for APs in the Netherlands with the ebIX® BRS, which was discussed:

- Daily Measured Data Accounting Point Electricity (continuous, from MDR to DSO):
 - The Dutch GS1 MDR attribute is not part of the ebIX® Model. The discussion showed that this information probably is needed for the exchange between the Metered Data Administrator (MDA) and the final recipient (BRP, Energy Supplier ...) in case of complaints, and is probably not needed in the BRS for Validated Data from validator to Metered Data Administrator, who can know this from the master data he gets.
 - It was noted that also in Slovenia and in Norway an Energy Supplier (or other actor) can send a complaint (or other request) to the MDR (Validator) via the hub, hence this information (the ID of the MDR) must be added to other BRSs containing validated data from the MDA.
 - It was added a note for relevant documents in Appendix A that we must investigate the need for addition of MDR and MGA in the root classes for BRS containing validated data from the MDA.
 - Resolution was moved from the root-class to Series Characteristics for all documents. This offers flexibility to send data for different products with their different resolution (as e.g. production

may have a higher resolution than consumption, of reactive energy may have a lower resolution than active energy for the same AP.

- In the Dutch requirements, Origin, Validation Status and Repair Method are separate attributes. It is however assumed that these attributes can be merged into the Quantity Quality from the ebIX® model (see also actions for Kees).
- Currently there is an Origin attribute in the Register Read class. Origin was added to the Observation class.
- Periodically (Monthly) Measured Data Accounting Point Electricity (continuous + meter read, from MDR to DSO):
 - It seems that the Dutch requirements fits better to the ebIX® document for Profiled APs.
 - The ebIX® Register Read class is in the Dutch requirements split into a Register class and a Meter Read class, where the Meter Read class can be repeated (for different Registration Date Times) within the Register class.

Action:

- Kees will provide code lists (with definitions in English) for Origin, Validation Status and Repair Method.
- Kees will investigate if the “Periodically (Monthly) Measured Data Accounting Point Electricity” is missing a Resolution or if this is meant for an aggregated value. Further, Kees will find some examples of usages.

4 EU directive 2019/944 of June 5th, 2019 on common rules for the internal market for electricity

Appendix B EBG project and survey list

B.1 Potential projects

#	Project description	Priority	Start
A)	Review what attributes to send in a confirmation (e.g. all from the request, only approve/disapprove or some core attributes, such as AP)	First possible face-to-face meeting	First possible face-to-face meeting
B)	Review and propose update to the HRM, based on new procedures from ETC and EBG, ref minutes from ebIX® Forum meeting March 24 th , 2020.	After review of BRSs	TBD
C)	Efficient data alignment, including the possibility to request historical and/or future master data.	EBG must do a survey for the need of such a project	Not prioritised
D)	Discuss differentiation of data sets per Entitled Role when aligning master data (e.g. when referencing notification of AP master data in a BRS)	EBG task – will be linked to “C), Efficient data alignment” task and GDPR	To be started Q1 2021
E)	Making a BRS for alignment of Exchange Point characteristics	TBD	TBD
F)	1) Making MRs to the HG for definition for and relations between Gateway, Gateway Operator and Gateway Administrator 2) Making a BRS for Gateway related stuff.	Awaiting decision in Germany or elsewhere	TBD
G)	Making an introduction to the ebIX® BRSs, including an overview of the BRSs and a short description.	In finalising RtR	TBD
H)	Review of MR NMEG 2021/2 (to ebIX®) – Addition of a Supply Start Date to the AP Administrative Characteristics class in Alignment of AP characteristics BRS	TBD	TBD
