The minutes from previous meeting.

3 Resolve issues (if there are any) after ebIX® Forum, ETC and EBG planning meeting for “review of EG1 Implementation Acts”

EBG will have a special focus on the review of the EG1 Second Implementing Act (near real-time and historic measured data) since the content overlaps with the EBG BRSs.

The review period is expected to start May 26th and end June 21st. It is scheduled four GoToMeetings for making comments to the EG1 Second Implementing Act (real-time and historic measure data):

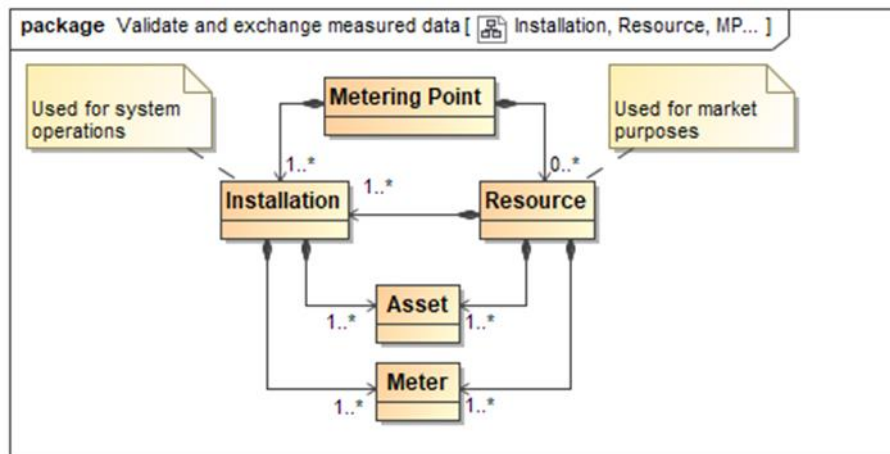

- Wednesday May 26th, 15:00 – 16:30
- Tuesday June 1st, 10:30 – 12:00
- Wednesday June 9th, 15:00 – 16:30
- Wednesday June 16th, 15:00 – 16:30

4 Continue review of BRS for Validated measured data

All had as action from previous meeting to investigate if peaks are being exchanged in their countries.

- In Slovenia 15 minutes time series are sent and the receiver must pick the peaks himself, if needed. To grid fee billing the peaks are determined as the average of the three highest peaks in a month.
- In the Netherlands, the peak power consumption is measured and distributed for industry customers.
- In Germany peaks are used – details to follow.
- In Norway, the DSOs may base the grid fee on one or more peaks within a period of maximum one month, like the principles in Slovenia.

At the ebIX® Energy Flexibility Services project the day before, EBG/RtR was asked to discuss if we could replace the Installation with Resource in the BRS for Validated Measured Data. The topic was discussed based on the following picture from the Flex BRS:

- Bostjan explained that in Slovenia there may be separate meter(s) within an Accounting Point, used for “special objects” such as for flexibility. However, these “special objects” may be seen as Resources. There are similar constructs also in the other European countries.

Conclusion:

- Since Installation is used for system operation and Resources are used for market purposes, we replace Installation with Resource in the BRS for validated measured data.

Thereafter the BRS was reviewed:

- Installation was replaced with Resource all over.
- It was also discussed how to add peaks in the BRS. It can be determined from the Energy Product or the Measure Unit. However, the product will only work for electricity (since there only is one product available for gas), hence measure unit was chosen.

Continued action:

- All are asked to investigate if peaks are being exchanged in their countries.

5 If time: Continue review BRS for Measure for Billing

Due to lack of time, the item was postponed.

6 EU directive 2019/944 of June 5th, 2019 on common rules for the internal market for electricity

Due to lack of time, the item was postponed.
