1   Approval of agenda

The agenda was approved, however item 3 (Final review of BRS for Validated measured data) was skipped since Kees couldn't participate.

2   Approval of minutes from previous meeting

The minutes from previous meeting were approved.

3   Final review of BRS for Validated measured data

Ove had as homework updated the sequence of the three first attributes in the four documents Validate measured data for profiled AP, continuous metered AP, Exchange Point and Resource to:

> Product identifier
> Product measure unit
> Direction

The item was postponed.

4   Review of the project plan for ebIX® Area project

Starting a project for alignment of master data for areas has been discussed within ebIX® Forum, ETC and the ebIX®, EFET and ENTSO-E harmonisation group for several years. ENTSO-E is interested in such a project but

informed this spring that CIM EG/ENTSO-E does not have enough resources to join this project now. However, at the spring ebIX® Forum meeting this year it was suggested that ebIX® run this project on our own, unless ENTSO-E changes its mind.

Gerrit had as action from previous meeting asked some Dutch gas persons if they could be interested in participating in an area project, however so far without a response.

The project plan was reviewed. During the review it was noted that we already have a BRS for alignment of Area characteristics, published in October 2020, hence it was agreed to rewrite the whole project plan, among others by:

- Renamed the project plan to: *"Project plan for harmonising master data for Metering Grid Areas between market segments"*;
- The introduction will be rewritten;
- Add class diagrams showing main domains from the electricity and gas markets as an appendix;
- Etc.

Actions:

- All to investigate if we also shall invite the gas sector (e.g. ENTSOG) to the project.
- Gerrit and Ove will rewrite the project plan.
- When the update is done, we will draft a mail that Vlatka will be asked to send to Jon-Egil and Olivier in ENTSO-E, with the updated project plan.

5   Action item related to gas areas

The item was postponed.

6   Finalise addition of processes for Calorific Value in version 3.1 of the BRS Measure for Billing

Ove had as action updated and distributed the BRS to EBG.

The item was postponed.

7   If time, start review of BRS for Measure for Labelling

The item was postponed.

8   Review of CIM definitions for classes and attributes based on mapping from ebIX® class diagrams for Validated measured data for continuous metered AP to CIM

The item was postponed.

Appendix C   Mapping from ebIX® class diagrams for Validated measured data for continuous metered AP to CIM

The mapping will be reviewed by ETC, while EBG will look into the definitions of classes and attributes to see if we need to update the ebIX® definitions or if we should send maintenance requests to IEC for update of the CIM definitions.
